

OnCorp Direct Inc. Launches BizInfoTracker: A Powerful New Application to Retrieve Legal Status and Registration Information on Businesses Across Canada and U.S.

OnCorp Direct Inc. announces the release of BizInfoTracker, a cutting-edge online application that facilitates the retrieval of company information from over 60 government directories. Users can quickly locate and obtain profile information on any company registered in Canada or the United States with a single query.

(PRWEB) September 16, 2005 -- OnCorp Direct Inc. announces the release of BizInfoTracker, a cutting-edge online application that facilitates the retrieval of company information from over 60 government directories. Users can quickly locate and obtain profile information on any company registered in Canada or the United States with a single query.

"BizInfoTracker will significantly reduce the amount of time and money required to conduct cross-border business," says Ms Rani Advani, CEO of OnCorp Direct Inc. "By empowering our clients to search multiple jurisdictions through a single query from the comfort of their own PC, firms not only save on substantial conveyancer fees, but also save valuable hours when faced with time-sensitive deals and deadlines."

"We often search for U.S. companies without knowing which state they are incorporated in," says Ms Beatrice Lorusso of Toronto law firm Goodman & Carr LLP. "BizInfoTracker has been very useful to quickly identify the states where the company is registered, and the turnaround time is excellent."

"The business and legal communities in Canada and the U.S. will achieve significant benefits from using BizInfoTracker to access vital information required in the course of daily business," says OnCorp's Business Development Manager Mr. Eric Tong. "OnCorp clients have a competitive advantage by getting to use it first."

BizInfoTracker is the third exclusive search application launched by OnCorp in the past year. OnCorp's Comprehensive Pre-Search for business name availability searching and Electronic Due Diligence Search for securities searching are already widely acclaimed by OnCorp's clients.

Powered by the state-of-the-art data aggregation engine CloserLook[™] developed by CloserLook Search Services Inc. (formerly GOA Technologies), OnCorp's BizInfoTracker is based on the same design principles that have made all of OnCorp's search and registration applications so popular: intelligent, efficient, and user-friendly features built on a powerful technology platform, providing the superior value to which OnCorp's clients have become accustomed.
